CRUSHED STONE AND SAND AND GRAVEL IN THE SECOND QUARTER 2018

An estimated 393 million metric tons (Mt) of *crushed stone* was produced and shipped for consumption in the United States in the second quarter of 2018, an increase of 7% compared with that of the second quarter of 2017. The five leading States, in descending order of production for consumption, were Texas, Pennsylvania, Florida, North Carolina, and Ohio. Their combined total production for consumption in the second quarter of 2018 was 129 Mt and represented 33% of the U.S. total. Production for consumption in the first 6 months of 2018 increased by 3% compared with that of the same period of 2017.

The estimated U.S. output of *construction sand and gravel* produced and shipped for consumption in the second quarter of 2018 was 265 Mt, an increase of 6% compared with that of the second quarter of 2017. The five leading States, in descending order of production for consumption, were California, Texas, Arizona, Michigan, and Washington. Their combined total production for consumption in the second quarter of 2018 was 97.2 Mt and represented 37% of the U.S. total. Production for consumption in the first 6 months of 2018 increased by 7% compared with that of the same period of 2017.

An estimated 658 Mt of total *construction aggregates* was produced and shipped for consumption in the United States in the second quarter of 2018, an increase of 7% compared with that of the second quarter of 2017. The five leading States, in descending order of production for consumption, were Texas, California, Pennsylvania, Florida, and Ohio. Their combined total production for consumption in the second quarter of 2018 was 196 Mt and represented 30% of the U.S. total. Production for consumption in the first 6 months of 2018 increased by 5% compared with that of the same period of 2017.

The above estimates are based on information reported to the U.S. Geological Survey (USGS) on its quarterly sample survey by *construction aggregates* producers.

Portland (including blended) cement consumption increased by 5% in the second quarter of 2018 compared with that of the second quarter of 2017. Consumption in the first 6 months of 2018 increased by 3% compared with that of the same period of 2017. This information was obtained from the USGS monthly survey of U.S. cement producers.

This sample survey generates production-for-consumption estimates by quarters, based on information reported voluntarily by a limited number of producing companies. In most quarters, a few companies may report amounts sold in the current quarter that vary greatly from the amounts reported in the previous year during the same quarter. The usual cause behind a large change can be attributed to the opening or closing of an operation, weather, or an external force that only the company or one of its operations experienced in that quarter. Previously-reported data are occasionally revised, and the estimated quantities for the prior quarters are then recalculated. The latest release of the quarterly Mineral Industry Surveys contains the most recent estimated totals and supersedes previously published reports.

List services and web feed subscribers are the first to receive notification of USGS minerals information publications and data releases. For information on how to subscribe, go to <http://minerals.usgs.gov/minerals/>.

¹Quarterly totals shown are estimates based on a sample survey. Estimated quantities for prior quarters have been recalculated.

²Sales region equivalent to U.S. Census Bureau Geographic Division as follows: New England (CT, MA, ME, NH, RI, VT); Middle Atlantic (NJ, NY, PA); East North Central (IL, IN, MI, OH, WI); West North Central (IA, KS, MN, MO, NE, ND, SD); South Atlantic (DE, FL, GA, MD, NC, SC, VA, WV); East South Central (AL, KY, MS, TN); West South Central (AR, LA, OK, TX); Mountain (AZ, CO, ID, MT, NM, NV, UT, WY); Pacific (AK, CA, HI, OR, WA).

³Data may not add to totals shown because of independent rounding and differences between projected totals by States and by divisions.

⁴Compared with same period of preceding year; all percentages are calculated using unrounded totals.

⁵Includes all 50 States.
