CEMENT IN OCTOBER 2020

This report provides monthly data on the shipments of cement to final customers and the production of clinker in the United States from January 2019 through October 2020. Data on the imports of cement and clinker for October 2020 also are provided.

Total shipments of portland and blended cement, including imports, in the United States and Puerto Rico in October 2020 were 9.8 million metric tons (Mt), a 3% decrease from shipments in October 2019 (tables 2A and 2B). Shipments for the year through October totaled 86.6 Mt, essentially unchanged from those for the same period in 2019. The leading producing States for portland and blended cement in October 2020 were, in descending order, Texas, Missouri, California, Florida, and Michigan (table 1A); these States accounted for 41% of cement produced. The leading cement-consuming States (Texas, California, Florida, Ohio, and Illinois) received 38% of October shipments (tables 2A and 2B).

Masonry cement shipments totaled 208,000 metric tons in October 2020, a 7% decrease from those in October 2019 (table 2C). Shipments for the year through October totaled 2.0 Mt, a 3% decrease from those for the same period in 2019. The leading masonry-cement-consuming States in October 2020 were, in descending order, Florida, Texas, North Carolina, Tennessee, and Georgia; these States received 55% of October shipments (table 2C).

Clinker production, excluding Puerto Rico, totaled 7.2 Mt in October 2020, a 5% decrease from production in October 2019 (table 4). Production for the year through October totaled 64.8 Mt, a slight decrease from that for the same period in 2019. The leading clinker-producing States in October 2020 were, in descending order, Texas, California, Missouri, Florida, and Alabama (table 4).

Tables 5, 6, and 7 list import data from the U.S. Census Bureau; however, data for clinker imports into the Seattle, WA, and the Detroit, MI, customs districts do not include material

trucked in from Canada on an informal-entry basis. Likewise, reported imports of cement into the El Paso, TX, district may be missing significant informal entries from Mexico. Monthly imports can show significant year-over-year changes for a variety of reasons and commonly do not correlate well with consumption levels in the respective import districts in the same month. October 2020 imports of cement and clinker totaled 1.6 Mt, a 20% increase from imports in October 2019. Imports for the year through October totaled 14.3 Mt, a 3% increase from those for the same period in 2019.

One cement plant was idled in April because of decreased demand resulting from restrictions put in place to mitigate the spread of the COVID-19 pandemic (Global Cement News, 2020). However, the U.S. cement industry has shown no prolonged or widespread negative effects from the pandemic. For January through October, shipments of portland cement were virtually the same as those in the same period of 2019, and masonry cement decreased by 3%. Clinker production decreased slightly for January through October compared with that in the same period of 2019.

[†]Revised.

¹Data are unrounded but are thought to be accurate to no more than three significant digits.

²Includes imported cement and cement manufactured from imported clinker.

³As reported by domestic and Canadian cement manufacturers and other importers.

⁴Data may not add to totals shown because of independent rounding.

-- Zero.

¹Data are unrounded but are thought to be accurate to no more than three significant digits.

²Includes imported cement and cement manufactured from imported clinker.

³Blended cement defined per ASTM standard C595.

⁴Includes U.S. possessions and territories.

⁵Data may not add to totals shown because of independent rounding.
