COBALT IN DECEMBER 2001

On the basis of preliminary data, U.S. consumption of cobalt in 2001 was 5% lower than that during 2000, according to the U.S. Geological Survey. The cobalt content of U.S. imports of cobalt metal and chemicals was 9% higher during January through November 2001 than that of imports during the same period in 2000. The cobalt content of U.S. exports of unwrought cobalt and chemicals was 26% higher during January through November 2001 than that during the same period in 2000. Trade data for December 2001 will be available in a subsequent issue.

Note

With the exception of prices, all data in this report have been rounded to no more than three significant digits. Totals

and percentages were calculated by using unrounded data.
