Iron Ore, Monthly

IRON ORE IN JUNE 1987

U.S. mine production and shipments of iron ore were slightly higher than those in May, according to the Bureau of Mines, U.S. Department of the Interior. Shipments from U.S. loading docks on the Great Lakes, however, totaled only 4.9 million long tons and were 13% less than those of the previous month. Imports rose 23% while exports, primarily to Canada, dropped 43%. Stocks of ore and agglomerates at consuming plants and U.S. receiving/transfer docks increased 13% during June to 11.0 million tons. Monthly consumption declined from 5.3 million tons to 5.0 million tons as the result of a 4% cutback in pig iron production. On June 30, 47 blast furnaces were in operation, 2 more than on May 31.

Data for the first 6 months of 1987 indicated declines in mine production (10.0%), mine shipments (13.6%), imports (19.5%), and consumption (10.0%), compared with those for the same period of 1986. Exports, in contrast, rose 31.3% to 2.0 million tons. Total stocks of ore and agglomerates reported at mines, docks, and furnace yards on June 30 were 23.4% lower than those of a year earlier. The stock average for the second quarter of 1987 was the lowest in more than 45 years.

In mid-June, union workers at Eveleth Mines reluctantly ratified a new 34-month contract that cut their wages 99 cents per hour and benefits 63 cents per hour. The cut lowered the average union wage to about \$12 per hour. At the same time, the 483 workers became eligible for incentive pay and regained some jobs lost to outside contractors. The new contract, which took effect July 1, also improved job security and streamlined grievance procedures. The workers, members of Local 6860 of the United Steelworkers of America, had been negotiating with Oglebay Norton Co., the operator and co-owner of Eveleth, for almost a year. The Eveleth agreement was similar to one worked out last January between the union and USX Corp.'s Minntac operation. Rouge Steel Co., which has a 31.7% equity in Eveleth, had threatened to cancel a 400,000-ton order for pellets unless labor costs were reduced.

On June 13, Wheeling-Pittsburgh Steel Corp. halted all agglomerating operations at its Follansbee, WV, by-product coke and sinter plant. The U.S. District Court ordered the sintering part of the complex closed indefinitely because it failed to meet air pollution standards established under the Federal Clean Air Act. The ruling was an outgrowth of a suit brought against Wheeling-Pittsburgh by the U.S. Environmental Protection Agency. The company has been operating under the protection of Federal bankruptcy laws since April 1985 and has been unable to provide the \$3 million needed for additional emission control equipment. The closure forced the layoff of 100 workers and complicated pig iron production at the company's five blast furnaces across the Ohio River in Steubenville.

Prepared in the Branch of Ferrous Metals, December 16, 1987.

Price update: Japanese ore buyers were able to complete most of their fiscal year 1987 1/ price negotiations with foreign producers by September 9. In almost every case, irrespective of ore type, the new price was lower than that for fiscal year 1986. Prices listed below are f.o.b., in U.S. cents per dry long ton unit of iron unless otherwise indicated:

<u>Country and Producer</u>	<u>Ore type</u>	<u>Prices</u>	
		<u>FY 1986</u>	<u>FY 1987</u>
Australia--Hamersley and Goldsworthy..	lump ore	30.29	28.78
Do.....	fines	25.97	24.67
Mount Newman.....	lump ore	30.29	<u>2/29.38</u>
