Iron and Steel Scrap  
Monthly Report No. 204

### IRON AND STEEL SCRAP IN OCTOBER 1957

Domestic consumption of ferrous materials, scrap and pig iron, during October, increased 3 percent over the previous month, but was 5 percent less than for the corresponding month of 1956, according to the Bureau of Mines, United States Department of the Interior. Iron and steel scrap consumed for all purposes during October increased 6 percent over September, with pig iron increasing slightly. The total charge of these materials (11,003,391 gross tons) consisted of 48 percent scrap and 52 percent pig iron, compared with 47 percent scrap and 53 percent pig iron during September.

Table 1 - Summary of production, receipts, consumption, and consumers' stocks of iron and steel scrap and pig iron, May 1957 to October 1957, in gross tons

Date	Scrap for consumption			Consumption		Consumers' stocks at end of month	
	Home scrap produced	Purchased scrap received (net)	Total	Scrap	Pig iron	Scrap	Pig iron <u>1/</u>

July 1957--	3,115,042	2,277,650	5,392,692	4,897,752	5,558,702	7,023,107	2,878,719
Aug. 1957--	3,341,628	2,428,579	5,770,207	5,299,543	5,769,995	7,493,892	3,086,853
Sept. 1957--	3,192,926	2,288,864	5,481,790	5,033,998	5,645,036	7,941,835	3,242,471
Oct. 1957--	3,385,672	2,141,461 <u>2/</u>	5,527,133	5,333,767	5,669,624	8,135,372	3,309,569

1/ Suppliers' stocks included with consumers' stocks.

2/ Excludes 210,090 gross tons of scrap shipped, transferred or otherwise disposed of during the month.

Prepared by James E. Larkin and James C.O. Harris, January 15, 1958, under the supervision of H. G. Iverson, Chief, Branch of Ferrous Metals and Ferroalloys, Division of Minerals.

Steel production and ferrous materials used in steel-making furnaces each increased 2 percent over September. The use of ferrous materials in these furnaces (open-hearth, Bessemer, and electric) totaled 4,061,947 gross tons of scrap, an increase of 5 percent over September, and 5,090,817 tons of pig iron, a slight decrease from the previous month. The total steel furnace melt (9,152,764 gross tons) consisted of 44 percent scrap and 56 percent pig iron. Electric furnaces used 718,791 tons of scrap during October, an increase of 7 percent over September.

The use of scrap by gray iron foundries totaled 817,338 gross tons, an increase of 13 percent over the 721,125 tons used during September. Pig iron consumed by this industry totaled 354,364 tons, an increase of 10 percent over the previous month.

Stocks of iron and steel scrap held by consumers and stocks of pig iron held by consumers and suppliers at the end of October exceeded the quantities of these materials on hand at the end of any previous month since these data have been compiled by the Bureau of Mines. Stocks of iron and steel scrap were equivalent to a 47-day supply at the October consumption rate and totaled 8,135,372 gross tons, an increase of 2 percent over September. Pig iron stocks totaled 3,309,569 tons, 2 percent higher than at the end of the previous month.

Total scrap for consumption (home scrap produced plus purchased scrap received) totaled 5,527,133 gross tons during October; home scrap accounted for 3,385,672 tons and purchases 2,141,461 tons. Of the purchases 84 percent was received from dealers and 16 percent from other sources. Receipts of purchased scrap is a net figure computed by deducting consumers scrap shipped, transferred, or otherwise disposed of during the month from total scrap received from dealers and all others.

Table 2 - Scrap produced, received, and consumed during October, stocks at consumers' plants October 31, 1957, and consumption year-to-date, by grades, in gross tons

DEALERS, BROKERS, AND AUTOMOBILE WRECKERS

The 1,007 identical companies reporting for September and October indicated that at the end of October, stocks of iron and steel scrap in their yards had increased slightly over September 30th; however, receipts, and shipments decreased 14 percent and 8 percent, respectively. Receipts in October, however, were slightly greater than shipments. Of the scrap handled during October, five grades (No. 1 and No. 2 heavy melting steel, bundles, low phosphorous, and cast iron scrap other than borings), represented 75 percent of the shipments and 41 percent of the stocks at the end of the month. Unprepared scrap stocks held in dealers and automobile wreckers yards at the end of October constituted 46 percent of the total stocks.

Table 4 - Dealers, brokers and automobile wreckers <sup>1/</sup>, receipts, shipments, and stocks of iron and steel scrap, for October, as percent of change from September 1957, in gross tons

	Receipts during month		Shipments during month to consumers and others		Stocks

<sup>1/</sup> As reported by 1,007 identical dealers and automobile wreckers for September and October.

<sup>2/</sup> Less than 0.05 percent decrease.

<sup>3/</sup> Less than 0.05 percent increase.

CONSUMPTION OF SCRAP IRON AND STEEL AND PIG IRON

Consumption of scrap in October totaled 5,333,767 gross tons which was at an average daily rate of 172,057 tons or 12 percent less than for the year 1956.

In October, open-hearth furnaces used 62 percent of the total scrap, and 86 percent of the pig iron compared with 63 and 85 percent, respectively, in September; electric furnaces in October used 7 percent of the ferrous materials (scrap and pig iron) charged to all furnaces, with open-hearth using 74 percent. During 1956, these percentages were 7 and 73, respectively. Blast furnaces used 5 percent of the total scrap; the corresponding percentage for the year 1956 was 5.

During October, steel-making furnaces (open-hearth, Bessemer, and electric) accounted for 76 percent of the total scrap, and 90 percent of the pig iron consumed, compared with 77 and 90, respectively, during September. In 1956, steel-making furnaces used 78 percent of the total scrap, and 89 percent of the pig iron. The remainder was used in iron-making furnaces, principally the cupola. Consumption by type of furnace during October is shown in the following table:

Table 5 - Consumption of iron and steel scrap and pig iron by manufacturers of ingots, steel castings and iron foundries during October 1957, by type of furnace, in gross tons

FOREIGN TRADE 1/

According to the Bureau of the Census, exports of iron and steel scrap totaled 513,353 gross tons in October and 408,727 tons in September. The quantity of scrap licensed for export during November 1957 totaled 246,048 gross tons, excluding Canada to which shipments do not require an export license, according to the Office of Export Supply, United States Department of Commerce. Exports of pig iron during October totaled 47,620 tons and 50,324 tons in September. Scrap and pig iron import data in October were not available for this release; these data will appear in the November release.
