Iron and Steel Scrap
Monthly Report No. 221

FERROUS SCRAP IN MARCH 1959

The combined domestic consumption of ferrous scrap and pig iron in steelmaking furnaces during March 1959 reached an all-time high and was 4 percent greater than October 1956, the previous record month, according to the Bureau of Mines, United States Department of the Interior. Ferrous scrap consumed in steelmaking furnaces (open-hearth, Bessemer, basic oxygen process, and electric) increased for the fourth consecutive month and was the second highest quantity ever consumed in these furnaces. The use of pig iron in these furnaces during March was at an all-time high and exceeded the previous record month of January 1957 by 4 percent. The total steel-furnace melt (11,402,608 gross tons), consisted of 46 percent scrap and 54 percent pig iron, compared with 47 and 53 percent, respectively, during February.

Table 1 - Summary of production, receipts, consumption, and consumers' stocks of ferrous scrap and pig iron, October 1958 to March 1959, in gross tons

1/ Suppliers' stocks included with consumers' stocks.

2/ Excludes 199,759 gross tons of scrap shipped, transferred or otherwise disposed of during the month.

Prepared by James E. Larkin and James C.O. Harris, June 24, 1959, under the supervision of H. G. Iverson, Chief, Branch of Ferrous Metals and Ferroalloys, Division of Minerals.

Total domestic consumption of ferrous scrap in March increased for the fourth consecutive month and was the highest monthly quantity consumed since October 1956. The use of pig iron during March was the highest monthly quantity ever consumed and was 3 percent greater than January 1957, the previous record month.

The use of scrap by gray iron foundries during March totaled 873,982 gross tons, an increase of 10 percent over the 791,137 tons, used during February. Pig iron consumed by this industry totaled 353,985 tons, an increase of 8 percent over the previous month.

Domestic stocks of ferrous scrap and pig iron held by consumers at the end of March totaled 11,414,935 gross tons, a decrease of 1 percent from the preceding month. Stocks of ferrous scrap were equivalent to a 38-day supply at the March daily consumption rate and totaled 8,242,936 tons, slightly higher than at the end of February, and 2 percent greater than stocks held on March 31, 1958. Pig iron stocks held by consumers and suppliers, totaled 3,171,999 tons, a decrease of 4 percent from those held on February 28, and 12 percent less than those at the end of March 1958.

Home scrap produced, plus purchased scrap received totaled 6,731,426 tons during March, 19 percent greater than during February; home scrap produced accounted for 3,869,752 tons, an increase of 19 percent over February. Net purchased scrap received totaled 2,861,674 tons, an increase of 26 percent over February and the largest monthly quantity received by consumers since January 1957. Of the purchases, 86 percent was received from dealers and 14 percent from other sources. Purchased scrap received is a net figure computed by deducting scrap shipped, transferred, or otherwise disposed of by consumers from total scrap received from dealers and all others during the month.

DEALERS, BROKERS, AND AUTOMOBILE WRECKERS FOR MARCH 1959

The 967 identical companies reporting for February and March indicated that at the end of March, stocks of ferrous scrap in their yards had decreased slightly from the end of the preceding month; however, receipts and shipments increased 18 and 16 percent, respectively. Receipts in March were 28 percent less than shipments. Of the scrap handled during March, six grades (No. 1 and No. 2 heavy melting steel, No. 1 and electric furnace bundles, No. 2 and all other bundles, low phosphorous and cast iron scrap other than borings) represented 67 percent of the total shipments and 44 percent of the stocks on March 31. Unprepared scrap stocks held in dealers and automobile wreckers yards at the end of March constituted 44 percent of the total.

1/ Includes shipments from yards, and direct shipments by dealers and brokers from other than yard operations.

2/ Less than 1 percent increase.

3/ Less than 1 percent decrease.

CONSUMPTION OF FERROUS SCRAP AND PIG IRON

Consumption of scrap in March totaled 6,677,499 gross tons which was at an average daily rate of 215,403 tons or 56 percent greater than for the year 1958.

In March, open-hearth furnaces used 63 percent of the total scrap, and 85 percent of the pig iron, the same percentages as during February; electric furnaces in March used 7 percent of the combined total of ferrous scrap and pig iron charged to all furnaces, with open-hearth using 74 percent. During 1958, these percentages were 7 and 73, respectively. Blast furnaces used 5 percent of the total scrap; the corresponding percentage for the year 1958 was 5.

During March, steelmaking furnaces (open-hearth, Bessemer, basic oxygen process, and electric) accounted for 79 percent of the total scrap, and 90 percent of the pig iron consumed, compared with 78 and 90 percent, respectively, during February. In 1958, steelmaking furnaces used 76 percent of the total scrap, and 90 percent of the pig iron. The remainder was used in iron-making furnaces, principally the cupola. Consumption by type of furnace during March is shown in the following tables:

Table 6 - Consumption of ferrous scrap and pig iron by manufacturers of ingots, steel castings and iron foundries during March 1959, by type of furnace, in gross tons

1/ Includes only those castings made by companies producing steel ingots.

2/ Excludes companies that produce both steel castings and steel ingots.

3/ Includes crucible furnaces.

4/ Includes consumption in all blast furnaces producing pig iron.

FOREIGN TRADE 1/

According to the Bureau of the Census, exports of ferrous scrap totaled 254,356 gross tons in March and 239,284 tons in February. During April 1959, the Office of Export Supply, United States Department of Commerce, issued scrap export licenses for 408,463 gross tons. Exports of pig iron during March totaled 92 tons and 146 tons in February. Imports of scrap totaled 21,141 gross tons in March compared with 17,903 tons in February. Imports of pig iron totaled 7,542 gross tons in March and 4,924 tons in February. In addition to the foregoing imports of pig iron during March there was 523 tons of sponge iron, valued at \$76,737, imported, of which 129 tons came from Canada and 394 tons from Sweden.
