BUREAU OF MINES
WASHINGTON 25, D. C.

Stewart L. Udall, Secretary

Frank C. Memmott, Acting Director

Iron and Steel Scrap Monthly

Iron and Steel Scrap in August and September 1964

Total consumption of scrap increased 5 percent in August and in September over the previous month, according to the Bureau of Mines, U.S. Department of the Interior. Total consumption of scrap and pig iron rose 4 percent in August over July and 3 percent in September. Scrap represented 48 percent of total metallics in August, the same as in July, but rose to 50 percent of total metallics in September 1964.

Scrap used in steelmaking furnaces (open-hearth, basic oxygen, electric, and Bessemer) increased 5 percent in August and 4 percent in September representing 44 percent of total metallics charged in August and 45 percent of the total metallics charged in September. The percent of scrap charged to the open-hearth rose 1 percent each month being 40 percent in September. The use of scrap in electric furnaces increased 7 percent in August and 8 percent in September, remaining at 98 percent of the total electric furnace charge. Use of scrap in metallics charged to basic oxygen converters increased 7 percent in August and 2 percent in September. In August scrap constituted nearly 31 percent of scrap charged to basic oxygen converters and in September it was just over 31 percent of total metallics charged.

^{1/} Suppliers' stocks included with consumers' stocks.

^{2/} Excludes 445,852 short tons of scrap shipped, transferred, or otherwise disposed of during month of August and 434,588 for month of September.

Prepared March 26, 1965, by Robert A. Whitman, Physical Scientist.

Consumption of scrap in gray iron foundries in August 1964 increased 5 percent over July. During September these foundries used 13 percent more scrap than in August.

U.S. consumers' stocks of iron and steel scrap increased 1 percent in August and 1 percent in September. It represented in September a 32-day supply at the average daily consumption rate of 237,764 short tons.

There was a 5 percent gain in the total of home scrap produced plus purchased scrap received in August as compared with July 1964. The gain in September over August was only 3 percent. Dealers furnished 75 percent of all scrap purchased in August and 77 percent of all scrap purchased in September. (Purchased scrap is a net figure computed by deducting scrap shipped, transferred, or otherwise disposed of by consumers, from total scrap received from dealers and all others.)

^{1/} Includes 445,852 short tons that was shipped, transferred or otherwise disposed of during the month of August, and 434,588 short tons during the month of September.

^{2/} Pennsylvania is divided into East and West by the eastern boundary of the following counties: McKean, Cameron, Clearfield, Cambria, and Somerset.

^{3/} Ohio is divided into East and West by the eastern boundary of the following counties: Ottawa, Sandusky, Seneca, Crawford, Morrow, Delaware, Franklin, Pickaway, Ross, Pike, and Scioto.

^{4/} Figures withheld to avoid disclosing individual company confidential data; included in U.S. total.

CONSUMPTION OF IRON AND STEEL SCRAP AND PIG IRON

Consumption of scrap in August totaled 6,766,125 short tons and in September, 7,132,932 short tons, which made the average daily consumption rate of 218,262 tons in August and 237,764 tons in September, and 7 and 16 percent, respectively, greater than for the year 1963.

Open-hearth furnaces used 51 percent of scrap and 75 percent of pig iron in September as compared with 52 and 75 percent, respectively, in August; electric furnaces used 9 percent of the combined total of iron and steel scrap and pig iron in both months; blast furnaces used 6 percent of the total scrap in August and 5 percent of the total scrap in September. Percentage for the year 1963 was 6 percent.

During September, steelmaking furnaces (open-hearth, Bessemer, basic oxygen converter, and electric) accounted for 76 percent of the total scrap, and 91 percent of the pig iron consumed, compared with 77 and 92 percent, respectively, during August. In 1963, steelmaking furnaces used 76 percent of the total scrap and 91 percent of the pig iron. The remainder was used in ironmaking furnaces, principally the cupola. Consumption by type of furnace in August and September is shown in the following table:

FOREIGN TRADE ^{1/}

According to the Bureau of the Census, exports of iron and steel scrap totaled 677,086 short tons in September compared with 709,223 tons in August, and 718,310 tons in July. Exports of pig iron during September totaled 22,264 tons compared with 2,264 tons in August, and 26,957 tons in July. Imports of scrap totaled 20,912 short tons in September compared with 22,597 tons in August, and 16,159 tons in July. Of the scrap imported during September, 20,662 short tons came from Canada and 250 tons came from other sources. Of the scrap imported during August, 21,999 tons came from Canada and 598 tons from other sources. Imports of pig iron totaled 45,976 short tons in September, 93,716 tons in August, and 89,549 tons in July. In addition to the foregoing imports of pig iron during September, there was 1,843 tons of sponge iron, valued at \$239,608, imported, of which 850 tons came from Canada and 993 tons from Sweden. Also during August 847 tons of sponge iron, valued at \$117,565 was imported, of which 296 tons came from Canada and 551 tons from Sweden.
