Iron and Steel Scrap, Monthly

IRON AND STEEL SCRAP IN DECEMBER 1973

Returns from 92 percent of reporting consumers indicated that consumption of iron and steel scrap in December was 6.4 percent above that in November according to the Bureau of Mines, U.S. Department of the Interior. Compared with November data, production was up 0.6 percent, net receipts were up 6.4 percent, and stocks were down 3.9 percent.

Exports of ferrous scrap during the month were 18.9 percent above those for November and 23.7 percent below those for December 1972. Total exports for the year through December were 52.0 percent above 1972 exports for the comparable period. Japan was the largest importer of U.S. scrap, taking 20.9 percent of the total exported in December 1973. Next largest exports were to Spain and Korea, which received 20.5 percent and 14.9 percent, respectively, of the total in December 1973.

The Iron Age composite price for No. 1 heavy melting steel scrap (Chicago, Pittsburgh, and Philadelphia) at the end of December was \$75.17 per gross ton, up 62.8 percent from the December 1972 price of \$46.17. The price of No. 2 bundles at the end of December was \$46.83, up 41.2 percent from the December 1972 price of \$33.17.

Pig iron production and consumption during the month were up 4.9 percent and 4.1 percent, respectively, from those of the previous month, according to the same reports from consumers. Stocks declined about 0.6 percent during December compared with those of November 1973.

The following import data were not available in time for inclusion in the November 1973, Iron and Steel Scrap Mineral Industry Surveys: Imports of scrap in November 1973 totaled 19,932 short tons compared with 31,922 in October. Of the scrap imported in November, 19,498 short tons came from Canada and 434 tons from other sources. Imports of pig iron totaled 54,962 short tons in November and 23,763 tons in October. In addition to the foregoing imports of pig iron during November, there were 208 tons of sponge iron valued at \$44,387 imported of which 12 tons came from Canada, 196 tons from other countries.

1/ Based on 92 percent return of reporting consumers.

2/ Includes only those manufacturers of steel castings that also produce ingots.

3/ Excludes companies that produce both steel ingots and castings.

4/ Based on 94 percent return from reporting consumers.

5/ Cumulative totals may not agree with sum of monthly reports because of addition of reports from late respondents.

FOREIGN TRADE

Exports of iron and steel scrap totaled 660,449 short tons in December compared with 555,490 tons in November. Exports of pig iron during December totaled 1,886 tons and 1,364 tons in November. Imports of scrap totaled 18,426 short tons in December compared with 19,932 tons in November. Of the scrap imported during December, 18,069 short tons came from Canada and 357 tons from other sources. Imports of pig iron totaled 30,539 short tons in December and 54,962 tons in November. In addition to the foregoing imports of pig iron during December there were 48 tons of sponge iron, valued at \$19,979 imported, of which 8 tons came from Canada, 40 tons from other countries.
