### IRON AND STEEL SCRAP IN NOVEMBER 1992

Returns from 38% of reporting consumers, representing 52% of total scrap consumption, indicated that consumption of iron and steel scrap on a daily average basis was unchanged compared with that in October 1992, according to the U.S. Bureau of Mines. Compared with October 1992 data, daily average production went down minimally, net receipts were down slightly, and stocks at the end of the month remained constant.

Exports of ferrous scrap for the month of October 1992 fell by 3% compared with those for September 1992. Turkey was the principal country of destination, accounting for 26% of the total exports in October 1992, followed by the Republic of Korea with 18% and Canada with 15%.

On a daily average basis, pig iron production rose by 3% and consumption rose by 12% in November 1992, compared with the previous month. Stocks of pig iron at month's end were down 4%, compared with those at the end of October 1992.

Table 14 shows that, based on quantity, New York, NY, was the leading customs district for exports in October 1992, accounting for 22% of total exports, followed by Los Angeles, CA, with 11%, and San Francisco, CA, with 9%. Laredo, TX, was the sole re-exporter, accounting for all re-exporting activity.

Table 16 reveals that, on a quantity basis, Seattle, WA, was the leading customs district for imports in October 1992, accounting for 24% of the total imports, followed by Detroit, MI, with 23% and Buffalo, NY, with 21%.

Prepared by the Branch of Metals and Branch of Data Collection and Coordination, February 4, 1993.

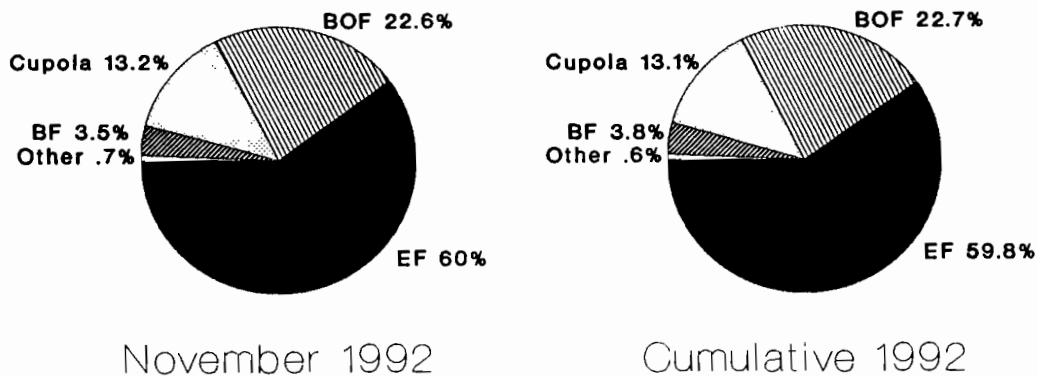

**James Boyd  
Memorial Library**

According to the American Iron and Steel Institute, domestic raw steel production in November 1992 amounted to 6,758,000 metric tons, down 4% compared with 7,023,000 metric tons in October 1992, and down marginally compared with 6,769,000 metric tons in November 1991. Year-to-date production through November 1992 was 76,349,000 metric tons, up 5% compared with 72,540,000 metric tons for the same period in 1991. The electric furnace (EF) portion of raw steel production for November 1992 was 36%, down 2% from October 1992, and was down marginally from the same period 1 year ago. The EF share through November was 37% in 1992, down minimally from 38% in 1991. Raw steel capability utilization in November 1992 was 80%, down marginally from 81% in October 1992, and up 2% from November 1991. Capability utilization through November was 81% in 1992 and 74% in 1991. Continuous cast steel production in the United States was 82% of total raw steel production in October 1992 and November 1992, and was up from 76% in November 1991. Through November, continuous cast steel production represented 79% of total raw steel production in 1992, compared with 75% in 1991.

An internal evaluation indicates that ferrous scrap consumption by electric furnace manufacturers of raw steel in 1992 was understated. This amounted to approximately 160,000 metric tons for November (preliminary), 280,000 metric tons for October (revised), and 3,300,000 tons for the year-to-date through November 1992.

As of January 1993, the U.S. Bureau of Mines will no longer collect and report monthly scrap data from steel casters, iron foundries, and miscellaneous users. These data will be collected and reported annually.

p/Preliminary. W Withheld to avoid disclosing individual company proprietary data.

1/Based on returns from 38% of reporting consumers, representing 52% of scrap consumption.

2/Includes only those manufacturers of steel castings that also produce raw steel.

3/Excludes companies that produce both raw steel and castings.

4/Data may not add to totals shown because of independent rounding.

5/Based on returns from 42% of reporting consumers, representing 60% of scrap consumption.

6/Includes production.

Table 2.-- Manufacturers of pig iron and raw steel and castings<sup>1/</sup> receipts, production, consumption, shipments and stocks of pig iron and iron and steel scrap, by grade, November 1992p/ 2/  
(Metric tons)

p/Preliminary.

1/Includes only those manufacturers of steel castings that also produce raw steel.

2/Based on returns from 43% of reporting consumers, representing 59% of scrap consumption.

3/Recirculating scrap resulting from current operations.

4/Obsolete scrap includes ingot molds, stools, and scrap from old equipment, buildings, etc.

5/Home scrap includes recirculating scrap.

6/Data may not add to totals shown because of independent rounding.

<sup>p/</sup>Preliminary.

<sup>1/</sup>Excludes companies that produce both raw steel and castings.

<sup>2/</sup>Based on returns from 29% of reporting consumers, representing 21% of scrap consumption.

<sup>3/</sup>Recirculating scrap resulting from current operations.

<sup>4/</sup>Obsolete scrap includes ingot molds, stools, and scrap from old equipment, buildings, etc.

<sup>5/</sup>Home scrap includes recirculating scrap.

<sup>6/</sup>Data may not add to totals shown because of independent rounding.

Table 4.-- Iron foundries and miscellaneous users receipts, production, consumption, shipments, and stocks of pig iron and steel scrap, by grade, November 1992p/ 1/  
(Metric tons)

| Item  | Receipts of scrap                         |                          |                                   | Production of home scrap     |   |                        | Shipments of scrap | Ending Stocks |

p/Preliminary.

1/Based on returns from 38% of reporting consumers, representing 37% of scrap consumption.

2/Recirculating scrap resulting from current operations.

3/Obsolete scrap includes ingot molds, stools, and scrap from old equipment, buildings, etc.

4/Home scrap includes recirculating scrap.

5/Data may not add to totals shown because of independent rounding.

P/Preliminary.

1/Includes only those castings made by companies producing raw steel.

2/Excludes companies that produce both raw steel and steel castings.

3/Data may not add to totals shown because of independent rounding.

4/Includes consumption in all blast furnaces producing pig iron.

5/Includes scrap and pig iron processed in metallurgical blast cupolas and used in oxygen converters.

6/Includes vacuum melting furnaces and miscellaneous uses.

7/Includes ingot molds and stools.

<sup>1</sup>/Revised.

<sup>2</sup>/Includes only those manufacturers of steel castings that also produce raw steel.

<sup>3</sup>/Based on returns from 42% of reporting consumers representing 62% of scrap consumption.

<sup>4</sup>/Recirculating scrap resulting from current operations.

<sup>5</sup>/Obsolete scrap includes ingot molds, stools, and scrap from old equipment, buildings, etc.

<sup>6</sup>/Home scrap includes recirculating scrap.

Table 7.-- Manufacturers of steel castings<sup>1/</sup> receipts, production, consumption, shipments, and stocks of pig iron and iron and steel scrap, by grade, October 1992<sup>r/ 2/</sup> (Metric tons)

<sup>r/</sup>Revised.

<sup>1/</sup>Excludes companies that produce both raw steel and castings.

<sup>2/</sup>Based on returns from 29% of reporting consumers, representing 21% of scrap consumption.

<sup>3/</sup>Recirculating scrap resulting from current operations.

<sup>4/</sup>Obsolete scrap includes ingot molds, stools, and scrap from old equipment, buildings, etc.

<sup>5/</sup>Home scrap includes recirculating scrap.

Table 8.-- Iron foundries and miscellaneous users receipts, production, consumption, shipments, and stocks of pig iron and steel scrap, by grade, October 1992r/ 1/  
(Metric tons)

r/Revised.

1/Based on returns from 44% of reporting consumers, representing 59% of scrap consumption.

2/Recirculating scrap resulting from current operations.

3/Obsolete scrap includes ingot molds, stools, and scrap from old equipment, buildings, etc.

4/Home scrap includes recirculating scrap.

Table 9.-- Consumption of iron and steel scrap and pig iron in the United States in October 1992 by type of consumer and type of furnace or other use r/ (Metric tons)

r/Revised.

1/Includes only those castings made by companies producing raw steel.

2/Excludes companies that produce both raw steel and steel castings.

3/Data may not add to totals shown because of independent rounding.

4/Includes consumption in all blast furnaces producing pig iron.

5/Includes scrap and pig iron processed in metallurgical blast cupolas and used in oxygen converters.

6/Includes vacuum melting furnaces and miscellaneous uses.

7/Includes ingot molds and stools.

1/Excludes used rails for rerolling and other uses and ships, boats and other vessels for scrapping. Export valuation is on a "free alongside ship" (f.a.s.) basis.

2/All or part of these data have been referred to the Bureau of Census for verification.

3/"Other" includes Code 70, which is for low-valued exports and imports between the U.S. and Canada, and Code 80, which is for items that leave the U.S. by mail.
