SODA ASH IN MARCH 2009

U.S. natural soda ash production in March was 732,000 metric tons (t), 9% higher than the previous month's production of 670,000 t, according to the U.S. Geological Survey. The continued downturn in production was because of poor economic conditions affecting domestic and export sales.

Ending inventories for March 2009 were 280,000 t, 3% higher than the preceding month's inventories. Wyoming trona production in March was 983,000 t. Total production of chemical caustic soda was withheld to avoid disclosing company proprietary data.

Apparent consumption of soda ash in February 2009 was 369,000 t, 7% lower than that of February 2008, and ending stocks were 43% higher.

Exports and imports of soda ash in February 2009 were 287,000 t and 495 t, respectively.

The trends in soda ash statistics for February 2009, compared with those of February 2008, were as follows: production was 24% lower; imports were 36% lower; exports were 44% lower; and apparent consumption, 7% lower. Imports and exports have dropped dramatically in 2009 compared with those of 2008 because of reduced domestic consumption of soda ash.

All percentages in this report were computed using unrounded data.
