TUNGSTEN IN JULY 2001

U.S. net production of tungsten metal powder and tungsten carbide powder produced from metal powder during January through July 2001 was 7% higher than that during the same period in 2000, according to the U.S. Geological Survey.

Total U.S. reported consumption of ferrotungsten, tungsten metal powder, tungsten carbide powder, tungsten scrap, and other tungsten materials in January through July 2001 was approximately equal to that during the same period in 2000. These materials were used to make alloys, cemented carbides, mill products, catalysts, and pigments.

Data for U.S. imports and exports for July 2001 will be published in a subsequent issue.

Note

All data in this report have been rounded to no more than

three significant digits. Totals and percentages were calculated by using unrounded data.

Update

Prices for tungsten ore concentrates in dollars per metric ton unit from Metal Bulletin are listed below. Prices in dollars per short ton unit were converted from metric ton unit prices and rounded to the nearest dollar. These prices represent combined prices for wolframite and scheelite ore concentrates with a minimum tungsten trioxide (WO₃) content of 65%. The prices for August 1 to 31, 2001, are as follows:

Low—\$65/metric ton unit WO₃ (\$59/short ton unit WO₃)
High—\$74/metric ton unit WO₃ (\$67/short ton unit WO₃)
